New and Emerging Occupations

Energy Efficiency

- ❖ Energy Auditors
- ❖ Energy Engineers
- ❖ Testing, Adjusting & Balancing (TAB) Technicians
- ❖ Weatherization Installers and Technicians

Green Construction

- ❖ Energy Engineers

Observations

- ❖ There will probably be **more enhanced skill** occupations (requiring re-skilling of incumbent or dislocated workers) **than in-demand** occupations (employing new workers).
- ❖ Most green occupations are expected to have **fewer than 1,000 annual openings** between 2006-16.
- ❖ Green **job-wage patterns** similar to the larger labor market (low-skilled occupations-more jobs-less pay).
- ❖ **Apprenticeship, licensing, and/or certification** important or needed for many of the more promising occupations.
- ❖ Many **new and emerging jobs** are for college graduates.
